NATURE  
TO YOU...**

# ABOUT US

One of the leading organizations in marble industry, Torunlar Marble is founded in Ankara by Aydın Yılmaz in 1982 with the purpose of using marble, the purest gift of nature, to enrich comfort and elegance. Torunlar Marble has earned its rightful place in the sector both with its domestic trade and its marble countertop exports to Arab countries through its innovative, resolute and competitive approach. In 1987, the company has opened the first marble block cutting factory at Östim and began meeting the marble step coating demands of residences. In 1997, the company began to produce its own marbles with the Haymana beige marble quarry in the Polatlı plains. Our passion for our job has increased with the demands for comfort from you, allowing us to begin block cutting works at a closed space of 1000 m<sup>2</sup> on a 7000 m<sup>2</sup> land in Yakacık Village. Since 1990, parallel to the fast growth of modular kitchen sector, the company has earned its rightful place in the granite countertop production market. Since 2000, the company undertakes the franchise of Çimstone Natural Composite Stone Enterprise Industry Trade Inc. that produces quartz based composite stone plates and continues its meticulous and quality production approach, foregrounding the customer satisfaction. In 2005, with the growth in the quartz based plate sizes, our company has made an additional investment at Östim and built a new factory to increase its production capacity to 50 linear meter/ day countertop production. In 2007, with another investment on 2500 m<sup>2</sup> land in Yuvaköy, it kept in check its production quality by working with modern production techniques in its production plants equipped with high-technology machine park. Since 2010 until today, the company provides services with Mopa Kitchen brand offering all kitchen furniture and with Franke brand offering all types of kitchen appliances at Anse Furniture & Decoration Center and at Bağlıca within the body of "LEDRA Countertop Systems", its own countertop brand. The company follows an improvement quality policy in countertop material manufacture and installation extending to post-sale services and aims at becoming the first in the constantly growing market. Our company has undertaken the distributorship of Silestone and Dekton brands of Cosentino Group and offers services as the authorized dealer sales representative of the leading brands of the kitchen countertop decoration sector renowned worldwide (Neolith). For the most productive processing of marble, an exhaustible natural wealth, the required latest Italian technology machine (GMM 6 axis CNC) allows it to increase its daily counterpart production to 150 linear meter/day and to manufacture all types of marble. Since 2016, the company offers natural stones or semi-precious stones procured domestically or from abroad to the liking of elite customers at Plaka Gallery under the brand of Torunlar Deppo. The company continues to successfully reflect in its field all types of applications for all living spaces, with marble blocks that is the only durable material commonly used in design and project, plates, 2D and 3D architectural design elements, tables and decorative products, along with many projects for interior and exterior spaces.

PRIVATE VILLA PROJECT ANKARA

# ONYX

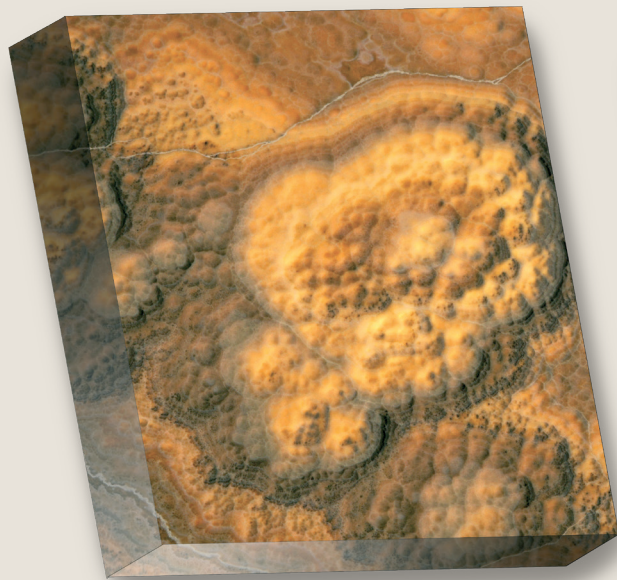

Onyx is different from the usual "marble". Just by its appearance, it cannot be separated from the marble. However, whereas Onyx is a semi-transparent, translucent stone, marble is not translucent. Whereas marble is mined from layers close to the surface, Onyx stone is at far deeper layers and has more value depending upon its color.
